

DATA SHEET

Business Hub

Managed Security Platform for Businesses

The Business Hub is a powerful cloud-based platform for businesses to manage all Avast Business solutions deployed in their networks. It provides real-time visibility of threats, comprehensive reporting, and management capabilities, all in a single platform.

Monitor threats from a single dashboard

Configure notifications based on specific device actions and monitor from a centralized dashboard for full transparency into individual device issues, as well as threats that might be spreading among connected devices.

Multi-tenancy support

Easily manage multiple sites or locations and streamline the responsibilities across large teams. Multiple users can be created to allow access to a limited portion of the Business Hub.

Enterprise-grade security services

Our cloud-based endpoint protection and network security solutions provide a complete, in-depth defense against all forms of malware and other cyberthreats – whether they originate from inside or outside the network via email, websites, or the Internet.

Connect securely to any managed device

Use our free remote IT tool to connect securely to any device with the Avast agent installed and remotely resolve issues, perform tasks, reboot computers, transfer files, and chat with users.

Features

Intuitive Dashboard

View all alerts at-a-glance, address issues, and get the information you need to make informed decisions, add services, and take quick action to increase uptime, stability, and security.

Device and Policy Management

Manage security for all devices with the Business Hub agent. Policy changes will automatically configure themselves on the agent-controlled devices in real time, requiring less maintenance and making it easier to scale business operations.

Detailed Reports

Generate and schedule easy-to-read, detailed activity reports with the click of a button. View reports that include blocked threats, task lists, protected devices, patch statuses, and more.

Notifications

Receive instant email notifications on any security threats or network issues that need your attention, including outdated antivirus applications, extended device inactivity, and additional device updates.

Master Agent

Select a device as the Local Update Server where all updates can be downloaded. Save bandwidth by scheduling and distributing updates to all endpoints in your network when it's convenient.

Commands

Quickly apply commands across devices like scans, restarts, and more. Run commands automatically based on policy settings.

Services

Next-Gen Antivirus

Multi-OS AV blocks cyberthreats from entering your network, protects against zero-day attacks, and identifies new threats.

Next-Gen Antivirus Pro

Get additional security with features including Data Shredder and server protection for Exchange and SharePoint servers.

Next-Gen Antivirus Pro Plus

Get the full antivirus package with SecureLine VPN, Browser Cleanup, and Webcam Shield.

Patch Management

Stay ahead of vulnerabilities by identifying critical patches and easily deploying them across all endpoints from one dashboard.

Premium Remote Control

Connect securely to any device from any location to remotely resolve issues, perform tasks, reboot, transfer files, and chat with your users.
